

call the person in charge of dorm assignments (buy a college book if you need to). Eventually, if done right, you will have a list of possible #'s, and set your modem on scan, and look for carrier detect. One of these nerds...ahm! I mean Geniuses must have a computer with a modem, and these guys will answer about 100% of your technical problems.

Practical Jokes:

If you are into practical jokes like I am, than here is a book for you:

"The Second Official Handbook of Practical Jokes"

by: Peter Van Der Linden

There are hundreds of good practical jokes and phone scams, as well as a section of computer jokes, with a whole program of re-writing the COMMAND.COM file to be funnier than ever.

176.Shaving Cream Bomb by Exodus

This may not really be what we would consider a bomb, but it is a helluva great idea to phuck someone over. You will need:

- (1) Person you hate who has a car.
- (1)-Container of liquid nitrogen (try a science shop, or Edmund Scientific, mentioned in several places in this Cookbook)
- (6-10)-Cans of generic shaving cream.
- (1)-Free afternoon (preferably in FREEZING temperatures outside)
- (1-or more)-Pairs of pliers, for cutting and peeling.
- Some phriends.

Directions:

Find someone who owns a small compact car, and manage to find out where he keeps it at night (or while he is away!) Be able to open the car repeatedly.. Place a can in the liquid nitrogen for about 30 sec. Take it out and carefully and QUICKLY peel off the metal outside container, and you should have a frozen "block" of shaving cream. (It helps to have more than one container, and more phriends) Toss it into the car and do the same with all the cans. A dozen or more "blocks" like this can fill and lightly PRESSURIZE a small car. When he opens the door (hopefully he doesn't realize the mess inside due to the foggy windows), he will be covered with pounds of shaving cream that is a bitch to get out of upholstery.

PS! Try to get one in his glove compartment!!!!

177.Another good way to rip off a change or drink machine by ?id flèsh

You first get a nice new dollar to work with. Make sure there are no rips in it. Now, you get a thin piece of transparent plastic about 3/4 the width of the actual dollar. It must be a good 6" or longer. Next, you need some transparent tape. Scotch magic tape will work the best. You simply tape the plastic strip to the dollar. But, you must be careful not to tape it more than «" up the side of the dollar. Tape it on both sides (front and back, not top and bottom) of the dollar. Now, all you have to do is use it:

Walk casually up to the secluded machine. Take out your dollar, and put it into the machine. BE CAREFUL! Some of the more modern change machines have alarms! Most likely, though, drink or candy machines will not. Now, the machine starts taking your dollar.... You wait until your plastic strip is almost all the way into the machine, and then you pull with sufficient force to get the dollar out of the machine, but not rip it. If you did it correctly, you should have gotten whatever you bought, and still have your dollar for later use. On candy machines, though, make your selection, and then wait and pull the dollar out. Don't worry if you don't get it on the first few tries. It took me about 5 tries to master it. It DOES, I repeat DOES work for a fact if done correctly. If you just can't get it, though, either the machine is too sophisticated, or you put the tape up too high on the dollar. Have fun!!!!

178.Lockpicking for the EXTREME beginner... by ?id flèsh
