- Take stuff that will sell easily to friends, and don't waste time taking things that look neat, just take the basics: electronic, computer, TV, VCR, some jewelry-things you could easily hock, preferably without inscriptions, raid the fridge, take good quality fones, stereo equip., speakers, etc..

- Always case the outside of the house looking for security stickers that yuppie families like to place in full view.

- Do mischievous shit like cut all fone lines in house, cut up couch cushions, and flip them over so they look perfectly normal!; shoot a hole in their fish tank, (all yuppies own fish); slash clothes, then put them back into the drawer; unplug fridge; set thermostat way up to 99.9∅; leave drain plugged and let the faucet run just a little, (for 6 hours!!); whatever you can't take or carry out, destroy in a subtle way, -if you can't carry out those 130 lb. wood case stereo speakers, slash the cones; break ball-point pens open and rub them into the carpet with their shoes; run a magnet over audio and VCR cassettes and floppies, and anything else subtle that would brighten their day.

175.MISCELLANEOUS INFORMATION   by Exodus

Easy explosive:

- Fill Kodak film case (y'know, the black cylinder with the gray cap) with explosive of your choice. Drill hole in gray lid, insert fuse, and tape it back together very tightly. Light.

        -or-

- Poke a hole it the gray cap facing outwards, and insert an M-80 with fuse going through the hole and reseal, taping it tightly ALL AROUND the case. Place in plastic mailbox, light, close door, and get the hell away! Because of the tight airspace, the destructive power of the explosion is increased 5X. Works under water too, with a drop of wax, or preferably rubber cement around where the cap and wick meet.

        -and-

- Fill a GLASS coke/pepsi bottle with 1 part gas, 1 part sugar, & 1 part water. Wedge an M-80 into the top about halfway. Shake the container, place in mailbox (hopefully with mail {hehe!}) light, and get the fuck away. This thing sends glass shrapnel EVERYWHERE, including through their mail.

Doorknob Shocker:

- Run a wire from one slot in wall outlet to the bracket in the wall that the knob's tongue inserts into. Run another wire from the other slot to an inconspicuous spot on the DOORKNOB. How does that one *grab* you?

Phone Loops: (remember, tone + silence = connection)

```
  NUMBER    |   Tone/Silence (T/S) End  |  STATUS (on connection)
-------------------------------------------------------------------
?-???-???-????          S          no match
1-619-748-0002          T          definite tone

x-xxx-749-xxxx          T          definite tone
?-???-???-????          S          no match

1-619-739-0002          T          definite tone
x-xxx-xxx-xxx1          S          not sure of match

x-xxx-738-0002          T          definite
x-xxx-xxx-0020          S          definite

x-xxx-7xx-0002          T          definite
?-???-???-????          S          no match
```

Actually, any 1-619-7x9-000x gives tone detect, finding the other silent connection is a wee bit harder.

If anyone manages to complete some of these, or any loops, please let me know.
