

- Bank Institutions.
- CompuServe and other Networks.

Voice Monitoring of:

- Bank Institutions.
- Mail Order businesses.
- Bell Telephone themselves.
- Any place handling sensitive or important information.
- Anyone that you may not like.

With just one Remob, someone could get hundreds of credit cards, find out who was on vacation, get CompuServe passwords by the dozens, disconnect peoples fones, do credit checks, find out about anything that they may want to find out about. I'm sure you brilliant can see the value of a telephone hobbyist and a telecommunications enthusiast getting his hands on a few choice Remobs. <Grin>

Caution

If any reader should discover a Remob during his (or her) scanning excursions, please keep in mind the very strict federal laws regarding wiretapping and unauthorized use of private Bell property.

102.Scarlet Box Plans **by The Jolly Roger**

The purpose of a Scarlet box is to create a very bad connection, it can be used to crash a BBS or just make life miserable for those you seek to avenge.

Materials:

- 2 alligator clips
- 3 inch wire, or a resister (plain wire will create greatest amount of static) (Resister will decrease the amount of static in proportion to the resister you are using)

- 1.Find the phone box at your victims house, and pop the cover off.
- 2.Find the two prongs that the phone line you wish to box are connected to.
- 3.Hook your alligator clips to your (wire/resister).
- 4.Find the lower middle prong and take off all wires connected to it, I think this disables the ground and call waiting and shit like that.
- 5.Now take one of the alligator clips and attach it to the upper most prong, and take the other and attach it to the lower middle prong.
- 6.Now put the cover back on the box and take off!!
